Education

Bachelor of Science in Computer Science And Programming

Belgrade University, Serbia | September 2013 - June 2017

Key Skills

- React
- Node
- Javascript/Typescript expertise
- State Management Design
- Video Player Integration
- API Design Knowledge
- UI/UX
- REST
- Nextjs

.Creative and Talented Software Developer with 5+ years of experience in designing user-centric, intuitive user interfaces and robust software solutions. Extensive expertise in React development, including advanced knowledge of design best practices and emerging UI development techniques. Proficient in connecting exceptional assets with users through creative UI frameworks and meticulous user experience optimization.

Specialized in video-streaming app design and development, with a strong background in implementing DRM configurations, developing VOD and live streaming players, and enhancing playback features. Successfully migrated video players to improve performance, designed and implemented ad managers, and collaborated with cross-functional

Professional Experience

Cross-Platform Software Engineer

Weather Channel | March 2022 - Present

- Spearheaded the development and maintenance of cross-platform video streaming applications utilizing NextJS, TypeScript, JavaScript, and React, focusing on feature enhancements and stability across three distinct applications.
- Instrumental in the implementation and configuration of video players and Digital Rights Management (DRM) systems, optimizing content protection and streaming quality.
- Introduced Kids Mode feature, implementing age verification and restricting playback to approved channels.
- Migrated the video player from Video.js to Shaka Player. This migration included optimizing streaming, reducing buffering times, and supporting a wider range of devices.
- Implemented cross-platform monetization using Cleeng.
- Developed and integrated preroll and midroll ads for video-on-demand content.

Software Developer (NextJS/TS)

Prototype.Next | January 2020 - March 2022

- Developed a web app for video-streaming content, based on subscription using NodeJS.
- Optimizing and integrating a new video player to the app.
- Successfully implemented user authorization and subscription features utilizing NextJS and Typescript.
- Tested REST endpoints using POSTMAN.
- Used React Refs, Controlled and Un Controlled react components
- Maximized use of Events and promises in ES6 and React for application control flow.
- Used babel and webpack for compiling and bundling the project.
- Worked with AXIOS, promise based HTTP client for the browser and node.js for hitting REST endpoints and fetching data into the app.

Software Developer (React)

MyHealthyDay, Miami, Florida | March 2018 - January 2020

- Worked with advance web development technologies like React, Node, Express, MySQL, Typescript, JavaScript, Immutable, Python, CSS, HTML, JavaScript Object

Notation.

- Outlined high-volume, high-scale web front ends for assets requiring responsive designs.
- Planned and developed interfaces that simplified overall management and offered ease of use.
- Created mobile applications based on React, integrating Facebook's best practices for interface design.
- Developed software for desktop and mobile operating systems.
- Added hooks in the project and moved some class-based components to functional components
- • Worked closely with development team members to identify and remove software bugs.
